Enjoy Internet services  
tailored to your activity

Relying on an ultra-modern, fast and fully secure cross-border fibre-optic network, **ONLINE** services offer you tailored professional Internet solutions and services.

You can opt for our **Online Business** service using asymmetrical bandwidths from 20 Mbps to 1 Gbps download speed and 1 to 500 Mbps upload speed.

Or you can choose our **Online Corporate** service which guarantees you an ultra-high-speed Internet access at any time with symmetrical bandwidths from 10Mbps to 10Gbps.

You can also combine Internet access with phone service thanks to our **COMPLETE** services.

# Online Business

## The simplest way to connect your business to Internet

Thanks to asymmetrical bandwidths from 20 Mbps to 1 Gbps download speed and 1 to 500 Mbps upload speed, you download your files within a few seconds and surf the Internet easily. You benefit from unlimited data transferred, 5 free email addresses defined as you wish and a static IP address which guarantees you a continuous presence on the web.

We provide you with professional terminal equipment and monitor your **Online Business** service via a MRTG (Multiple Router Traffic Grapher) web page. This program enables you to monitor your network, create statistics in a graphical form (data exchanged, number of connections, traffic, latency, requests, etc.) and save them in HTML files.

## Technical features

### Bandwidth

The **Online Business** connection provides an asymmetrical bandwidth. For more details about available speeds, as well as information about our open Internet, please visit our net neutrality page at [www.cegecom.lu](http://www.cegecom.lu)

### IP Address

One static public address is included. You can get a range of public IP addresses /29 on request.

### Access Infrastructure

DSL or Fibre Optic.

# Online Corporate

## Accessing ultra-high-speed Internet

Thanks to the symmetrical bandwidths from 10Mbps to 10 Gbps of the **Online Corporate** solution, you can exchange large files, surf the web with confidence, take part in high-quality videoconferences, synchronise your data quickly with remote servers and take full advantage of cloud computing services.

You enjoy first-class connectivity thanks to a large number of national and international network access points. You can benefit from our individual advice and tailored solutions, unlimited package for the volume of data transferred and monitoring of your **Online Corporate** service via a MRTG (Multiple Router Traffic Grapher) web page. This program enables you to monitor your network, create statistics in a graphical form (data exchanged, number of connections, traffic, latency, requests, etc.) and save them in HTML files.

## Technical features

### Bandwidth

The **Online Corporate** connection provides a symmetrical bandwidth. For more details about available speeds, as well as information about our open Internet, please visit our net neutrality page at [www.cegecom.lu](http://www.cegecom.lu)

### IP Address

According to your choice, one static public address or a range of public addresses /29 is included. You can get a range of public IP addresses /27 and /28 on request.

### Access Infrastructure

Possible backup lines via different technologies.
